Greetings! Dear Members, Colleagues, and Friends,

On behalf of the Asian Society for Breast Plastic and Reconstructive Surgery (ASBPRS), we invite you to participate in the "Inaugural Meeting and Seminar", held at the Chang Gung Memorial Hospital, Linkou, Taiwan, on 30th April 2016.

The first Asian Breast Reconstruction Forum was held at Linkou in 2009. Notable physicians from Taiwan and all over Asia were invited to exchange and share their experiences. Over the past years, the same Forum was held in Japan, Korea, Xi'an (China), Singapore, and Bali (Indonesia) respectively. Apart from the shared expertise and knowledge, a consensus was formed to found a breast plastic and reconstructive association, exclusively for the Asians. Finally, with collaborative efforts committed to making this happen, the Asian Society for Breast Plastic and Reconstructive Surgery (ASBPRS) was founded in Taiwan on 24th July 2015. We hope to utilize Taiwan's advanced plastic and reconstructive techniques in addition to its geographic advantage being the heart of Asia to lay the foundations of the Society, and to nurture and to promote the training of breast plastic reconstruction in Asia. In establishing this Society, we hope to create an environment where all plastic-related medical staff and physiotherapists have more opportunities to learn, exchange, and share their knowledge and experiences.

In addition to founding the Society, we have also planned for an "Inaugural Meeting and Seminar" to be held at the Chang Gung Memorial Hospital, Linkou, on 30th April 2016. We hereby cordially invite you to participate in this seminar. We have invited the current world experts in the field of breast plastic and reconstruction to present the latest innovations and techniques. The seminar is a 1-day event, comprised of live surgeries and lectures. The lecture sessions will include special lectures, free paper sessions, and discussions. The participants will not only observe the surgical details of this intricate procedure, they will also be able to gain a better understanding of all aspects of seamless team work.

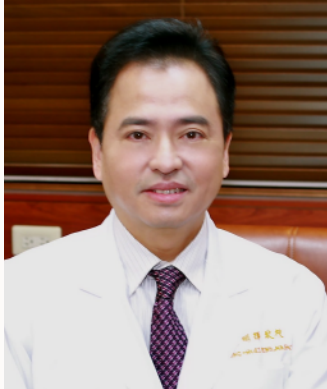

This is an opportune time to learn of breast plastic and reconstructive techniques and know-how. We sincerely invite you to the Seminar, and become a member of the ASBPRS. We promise you will reap great benefits from the seminar, as well, receive a comprehensive training plan provided by us.

Sincerely Yours,

Ming-Huei Cheng, MD, MBA, FACS
President
